Nano223

The World's Most Advanced Anti-Virus surface coating technology. Made entirely of Pure Titanium Dioxide (TiO2) nano particles. The transparent coating (applied on any surface) will instantly destroy harmful contaminants upon contact with it. It is non-selective and will destroy by oxidation, any :

- Virus
- Molds
- Bacteria
- Toxic gases

Simply spray Nano223 on any product/surface to instantly protect them against viruses and bacteria. Nano223 coating is Ultra durable and withstands normal non-abrasive cleaning for many months.

MAKES YOUR NEW & OLD ENVIRONMENT/PRODUCTS Self-Sanitize*. CONTINUOUSLY

How it works? with light energy.

Billions of Nano223's ultra small (2-3nm) & transparent particle becomes energised by any visible light to produce electrons that generate a super powerful oxidants that destroy all organic compounds upon contact. **NO MAINTENANCE COST NO REPLACEMENT OF ANY PARTS> JUST NEEDS LIGHT AND AIR > WORKS CONTINUOUSLY**
