

STAR SPECIAL NEWSPAPER (MALAYSIA)

25 OCT 2011 (TUES)

**E**VALUATE'S appointment this year as the sole agent to distribute Omniyo's products (Works, Moss, Advanced Nano Technology) is proof of its excellent management and marketing capabilities in taking on an international brand.

Good health is commonly associated with sleeping well, eating a well-balanced diet, exercising regularly and being in a state of mental and emotional well-being. But our health also depends on whether we are exposed to virus, bacteria, mould and other elements.

Harmful volatile organic compounds (VOC), room building materials cause irritants to fall sick. In fact, the World Health Organization estimates that more than two million people die each year due to breathing in or tiny particles present in polluted indoor and outdoor air. The United States Environmental Protection Agency (EPA) has found high concentrations of VOCs indoors which is 2-5 times higher compared with outdoor air.

Now, with the Omniyo Nano 223, you can breathe in cleaner air. Omniyo's breakthrough nano-coating technology comprises pure, ultra small, nano particles of Titanium dioxide that are colourless and transparent. It is specially designed as a spray-on coating to transform a normal surface into a self-sanitising surface.

The ultra-safe coating requires only visible light as its source of energy to continuously keep coated surfaces clean and safe by destroying viruses, bacteria, mould and VOC that come into contact with it - an electro-chemical process.

Omniyo's advanced nano technology ensures that the coating bonds virtually permanently to surfaces regardless of whether it is soft or hard, smooth or rough surfaces.

The Omniyo Nano 223 is has tested by renowned Japanese universities, international test labs and field-tested in many hospitals and commercial buildings with excellent results.

Most importantly, the Nano 223 is safe

# Saving lives

Omniyo's breakthrough nano-coating technology is made up of pure, ultra small, nano particles of Titanium dioxide that are colourless and transparent and can be sprayed on almost anything

and made with food-grade ingredients of pure TiO2 without the use of any binders and polymers. TiO2 is approved by the Food and Drug Administration. It has been widely used for more than 30 years and is exempted from certification.

The Nano 223 is effective and recommended for use on flooring, wall coverings, furniture and things in:

- Healthcare environments: hospitals, clinics and beauty centres
- Institutions: schools, child care centres

and others:

- Public transportation systems
- Hotels, airports and buildings
- Places of worship
- Houses, kitchen cabinets, all bed rooms and living areas
- Research environment
- Food-related factories and facilities for all types of materials such as:
  - Metals, aluminium and stainless steel
  - Plastic and composites
  - Glass or ceramics

- Fabric and lacquer
  - Textile and leather
  - Wood and composite
  - Concrete, marble, granite and composite
- The Nano 223 is best applied on new products and surfaces to prevent bacteria build-ups that may harbour disease-causing bacteria. For used or in-used products, thorough cleaning and repeat application of the Nano 223 is recommended to ensure direct bonding to substrate to avoid any superficial bonding to dirt or dust.

The Omniyo Nano 223 is perfect for use on:

- Discs, chairs, sofa, doors, cabinets, sanitaryware, heat fittings
- Equipment, toys, playhouse, car interior, air-conditioners and fans
- Uniforms, curtains, bags
- Public areas: where there are high contact points such as:
  - Handles, knobs, armrests and handrails
  - Keyboards, keypads, lift buttons and mobile phones
- Seals

Visit Esaltech's booth at HomeDEC and be amazed at how easy it is to transform every product/surface into one that helps fight virus, bacteria, mould and VOC gases with a simple coating of the Nano 223.

Bring along small items such as a handbag, school bag, toy or baby stroller and Esaltech will do a free live demonstration of coating for you. The Nano 223 is priced at RM159 for 4.17kg spray can. It is also bottled for commercial coating use with a specially coated Electro-Sprayer. There will be a soft launch of the product at HomeDEC and there will be a promotional special offer for the product.

- Esaltech will be at booth 1151 and 1152, Hall 1 in HomeDEC. For details or dealer enquiries call 016-530 3881 or call Omniyo at 03-7967 5000.

\*A health is a thin layer of food and bacteria that have built up on surfaces, showing no accumulation of inorganic and organic materials that can attach to most surfaces.
